This appliance has been designed to operate from a standard domestic power outlet. It is not intended for industrial or commercial use.

# How to Use Your 2 Slice Toaster

Before using the appliance for the first time, carefully unpack and remove all packaging material.

Plug the Toaster into a standard domestic power outlet and switch the power outlet on.

Adjust the variable browning control to the desired toast colour setting. Choose a setting based on the type of bread you are toasting and your personal preference. Start on a medium setting (3-4) and adjust the variable browning control to a lighter setting (1-2) or darker setting (5-6).

**Note: The condition of the bread will determine how quickly it toasts. Dry or stale bread toasts faster than fresh bread.**

Place bread into the bread slots and press the lever down until it locks into position.

**Note: The lever will not lock into position if the Toaster is not plugged into a power outlet or if the power outlet is not switched on.**

When toasting is completed, the toast will pop up and the Toaster will switch off automatically. Toasting may be interrupted during the cycle by pushing the cancel button. Toasting will stop and the toast will pop-up.

Allow the Toaster 15 to 20 seconds to cool before beginning the next toasting cycle. This permits the electronically controlled thermostat to reset for the next toasting cycle.

**Note: Do not touch the Toaster walls when the Toaster is in use.**

**Note: The lift lever is held down to test the anti-jam operation, the unit requires about 60 – 80 seconds cool-down period before used again.**

## Reheat button

Toast can be reheated by placing cold toast in the bread slots, lowering the lever and pressing the reheat button. The reheat light will come on and the toast will be reheated over a short, fixed period of time.

**Note: When using the reheat function, keep a close eye on the bread to ensure it doesn't burn.**

## Cancel function

The toasting cycle can be stopped at any stage by pressing the cancel button. The toast will pop up and the Toaster will switch off automatically.

## Defrost function

The defrost function is useful for thawing and toasting frozen bread all in one operation. Adjust the variable browning control to the desired toast colour setting. Start on a medium setting (3-4) and adjust the variable browning control to a lighter setting (1-2) or darker setting (5-6) depending on your personal preference.

Place bread or crumpets into the bread slots.

Press the lever down to the locked position and press the defrost button. The defrost light will illuminate.

When thawing and toasting is complete, the toast will automatically pop-up and the Toaster will switch off automatically.

# Care and Cleaning

**Note: Please read and follow the Care and Cleaning instructions supplied**

Switch off the power outlet and unplug the Toaster; ensuring you let the Toaster cool before cleaning.

Wipe over the exterior of the Toaster and power cord with a soft damp sponge or cloth.

Do not use abrasives or strong household cleaners, as they will damage the stainless steel finish.
